

Bryan Paronto

FULL STACK DEVELOPER & UI ENGINEER

bparonto@gmail.com - 239.200.2312 - Chicago, IL - github.com/apisandipas

SUMMARY -

I'm an experienced UI-focused full stack developer driven to deliver good software experiences by an insatiable thirst for knowledge, a deep love of creative problem-solving, and a desire to turn out quality work. Furthermore, I'm a technical and positive-minded planner who values working smart over working hard and comes to the table with solutions.

EXPERIENCE -

► **CONSULTANT & Sr. FRONT END ENGINEER @ Kind Systems**

From AUGUST 2022 to PRESENT

At Kind Systems, I was embedded in the Public Websites team at the Department of Veterans Affairs. While there, I rebuilt the main homepage, which sees 20 million unique visitors a month and contributed toward the resolution of thousands of accessibility infractions.

► **PRINCIPLE CONSULTANT & DEVELOPER, OWNER @ Cable Car Digital, LLC**

From NOVEMBER 2020 to AUGUST 2022

Self-employed / freelance consultant. Architecting and leading development of web-based projects with React, Express. Worked with a top appliance company to develop a reusable UI component library. Assisted a couple small startups launch their products including an automated clean-service scheduling application and a

► **Sr JAVASCRIPT DEVELOPER @ Caxy Interactive**

From APRIL 2019 to OCT 2020 / OCT 2021 to APRIL 2022

Helped lead development of JavaScript-powered web applications using React/Redux, Apollo Client, Node.js, Gatsby.js. Developed REST and GraphQL JSON APIs using Express and Apollo Server. Projects with the employer included an e-commerce React app, a learning management system, responsive HTML email templates, a client screening portal and an investor portal.

► **LEAD FRONT END ENGINEER @ GroundSpark**

From FEBRUARY 2018 to NOVEMBER 2018

Worked on a large Rails app for a small social media SaaS startup. Maintained and built new features on a CoffeeScript + Backbone + Marionette-based front end. My responsibilities included ownership of new front end features, planning a roadmap for incremental transition to React-based application. Lead front-end development of new social analytics dashboard.

► **FRONT END ENGINEER @ The PROGRAM**

From AUGUST 2016 to OCTOBER 2017

Built internal solutions (Retail Associates Training Portal) for high profile clients in the shoe/athletic apparel industry, utilizing Craft CMS (PHP), WordPress, React/Redux. Consulting on technical choices and feature planning efforts.

► **WEB DEVELOPER @ Doejo**

From FEBRUARY 2013 to JANUARY 2016

While at Doejo, I was a full stack developer in a fast-paced, agency/start up environment. I developed custom web solutions in various platforms including WordPress, Ruby on Rails, and Express/Node; Built SPAs in Angular.js, Node.js. Consulted with sales on technical recommendations for outgoing proposals.

► **FREELANCE WEB DEVELOPER @ Self Employed**

From MARCH 2012 to FEBRUARY 2013

While freelancing I worked with small businesses, agencies and startups to develop web solutions on platforms including WordPress, Ruby on Rails and Sinatra.

► **WEB DESIGNER @ Homes.com**

From JANUARY 2010 to MARCH 2012

Worked hands-on with Real Estate Agent clientele to develop personalized templates. Set the coding standard and authored templates used by the department. Conducted departmental training in CSS3, HTML5 & JavaScript/jQuery.

PORTFOLIOS -

Github - github.com/apisandipas

Personal Website - bryanparonto.com

Freelance Website - cablecar.digital

HIGHLIGHTED PROJECTS -

▶ **AlpineHomeAir.com** - *with Caxy Interactive*

Spearheaded development of this custom ecommerce web experience as my first project at Caxy Interactive. This included researching, prototyping and architecting the front end using ReactJS, Redux and Styled Components. Helped lead the work of 2-3 other developers through feature planning, architecting and implementation of their assignments.

▶ **Zap2It.com** - *with Doejo, LLC*

I lead development of a data-heavy television listings data grid for this Tribune Media subsidiary. Implemented in React and a custom Backbone-based Flux implementation on the WordPress VIP platform.

▶ **JennAir.com** - *as Cablecar Digital, LLC*

Spearheaded and lead development of a multi-brand themable React-based UI Component system utilizing ReactJS, Storybook, and Styled-Components which integrated with Adobe Experience Manager CMS.
